Changes with Schaetti in 2011

Dear Friends

Schaetti has undergone turbulent times and I am happy to inform you today that the Schaetti Group is in full expansion again.

After taking over management of the company again and 100% of Schaetti Group, we carried out some strategic changes, invested heavily in both production sites, Griessen/Germany and Shanghai, and increased production capacities considerably.

I am also happy that during this period of reorganization/ reformation our staff and you – stuck - with Schaetti and we can continue to count you as loyal customers. For that reason our new slogan: We stick together!

Thanks to the keen demand for our products, which we will gladly present to you, Schaetti is in an intense growth phase.

Raw material prices and their scarcity are troubling and present a huge challenge, which we can only overcome together with our customers.

I am very happy that we could find a supremely competent new CEO with Mr. Wulf M. Weigel. This enables us to push our further growth and to be at your disposal for current business and for new projects.

We thank you for your confidence in Schaetti and look forward to our further good cooperation.

We stick together

Daniel Schaetti
